

Connecticut nursing homes are required by the Connecticut Department of Public Health (DPH) and the Centers for Medicare and Medicaid Services to report on the impact of COVID-19 on their residents and staff through CDC's National Healthcare Safety Network (NHSN). This reporting is intended to reflect recent COVID-19 activity in nursing homes.

The DPH weekly nursing home report uses data submitted to NHSN, which reflects the number of cases and deaths related with COVID-19 that occurred in the past week among both residents and staff. CT DPH began reporting NHSN data from June 17, 2020. Cumulative data for residents was rebaselined on July 15 and again on July 21 to account for false positives detected that week. Due to differing data collection and processing methods between NHSN and the data sources used previously DPH does not add the data before and after rebaselining due to the possibility of duplication of cases and deaths among prior and current data. Note that the data reported are current for the week of reporting and CT DPH is continuously updating and correcting any reporting errors.

*Confirmed* is defined as having positive laboratory test (NAAT/PCR or antigen) for COVID-19. This may include both those with and without symptoms of COVID-19.

*COVID-related deaths* are defined as persons with suspected or laboratory positive COVID-19 who died.

<sup>1</sup>Duplication of total count of staff with COVID may occur as staff work at multiple facilities during the week. NHSN methodology requires that positive staff to be included in the facility count, if the positive staff worked on location during the week the positive specimen was collected.

## EXECUTIVE SUMMARY

In 2020, 48 Delaware nursing homes operated 4,953 licensed beds. Most Delaware nursing homes (46 of 48; 96%) were privately owned and operated in 2020. Private facilities operated 94% of all nursing home beds in Delaware. Delaware's two publicly-operated nursing home facilities (Governor Bacon Health Center (GBHC) and the Delaware Hospital for the Chronically Ill) operated the remaining 6% of nursing home beds in 2020.

In 2020, 8,238 patients were admitted to Delaware nursing homes. In the same year, nursing homes discharged 8,758 patients. Fifty-one percent of patients discharged from Delaware nursing homes in 2020 were discharged home. Admissions and discharges to Delaware nursing homes follow racial demographic trends across Delaware. In 2020, White patients accounted for 76% of nursing home admissions and discharges. Patients of color accounted for 24% of nursing home admissions and discharges in 2020, with Black patients representing 22% of all admissions and discharges. Patients 75-84 years and 85 years or older accounted for 31% and 30%, respectively, of 2020 Delaware nursing home admissions. Twenty-four percent of 2020 nursing home admissions were individuals ages 65-74. Individuals under the age of 65 accounted for 16% of 2020 admissions. Similar age-related trends were observed for 2020 discharges.

The 2020 Delaware Nursing Home Utilization Statistical Report (DNHUSR) highlights many of the effects of the COVID-19 pandemic on Delaware nursing home utilization trends. Nationwide, the COVID-19 pandemic profoundly impacted nursing homes and other long-term care facilities that cared for individuals most vulnerable to the effects of the coronavirus. By June 2021, residents of long-term care facilities accounted for 758 of Delaware's 1,677 COVID-19 deaths (45%); individuals ages 65+ accounted for 83% of COVID-19 deaths in Delaware. In 2020, Delaware nursing homes admitted 30% fewer patients compared to 2019. From 2019 to 2020, the aggregate occupancy rate for private Delaware nursing homes fell from 86% to 77%. Future versions of the DNHUSR will monitor the long-term impacts of the COVID-19 pandemic on nursing home utilization trends.

The Delaware Health Care Commission (DHCC) continues to monitor annual nursing home admissions data to identify newly-emerging trends pertaining to long-term care and rehabilitations services within Delaware. Long-term care utilization surveillance includes monitoring projected changes in population size at the county and state levels. The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization.

## **ACKNOWLEDGEMENTS**

This report was funded by the Delaware Health and Social Services, Health Care Commission; it is the product of collaborative support from the Delaware Health Care Facilities Association, the Division of Services for Aging and Adults with Physical Disabilities, and all Delaware nursing homes. The Health Care Commission thanks these stakeholders and other subject matter experts who provided background information, analysis, and feedback to inform the development of this report.

## INTRODUCTION

This, the 34<sup>th</sup> edition of the Delaware Nursing Home Utilization Statistical Report (DNHUSR), summarizes Delaware nursing home trend data for January 2020 – December 2020. Data summarized in the DNHUSR are submitted on a monthly basis by Delaware nursing homes<sup>1</sup>, and aggregated at the end of the reporting year to yield annual trend data by nursing home facility and county. The DNHUSR presents 2020 Delaware nursing home data in two main sections. Part 1, Delaware Nursing Home Utilization Statistics, highlights historical facility utilization trend data from 2010 through 2020. Data presented in this section are aggregated to the state- and county-levels. Part 2, Facility-Level Nursing Home Utilization Statistics, presents facility data, including total patient days, occupancy rates, percentage of patients by source of payment, and annual admissions and discharges.

The 2020 DNHUSR highlights many of the effects of the COVID-19 pandemic on Delaware nursing home utilization trends. Nationwide, the COVID-19 pandemic profoundly impacted nursing homes and other long-term care facilities that cared for individuals most vulnerable to the effects of the coronavirus. By June 2021, residents of long-term care facilities accounted for 758 of Delaware's 1,677 COVID-19 deaths (45%); individuals ages 65+ accounted for 83% of COVID-19 deaths in Delaware.<sup>2</sup> In 2020, Delaware nursing homes admitted 30.3% fewer patients compared to 2019. From 2019 to 2020, the aggregate occupancy rate for private Delaware nursing homes fell from 86.2% to 77.1%. Future iterations of the DNHUSR will monitor the long-term impacts of the COVID-19 pandemic on nursing home utilization trends.

## STATEWIDE POPULATION PROJECTIONS

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. DHCC analyzed 2020 Delaware Population Consortium data to provide the context within which to evaluate Delaware's ability to meet nursing home bed demand. Figure 1 shows the projected increase of Delaware's total population from 2020 to 2050. Figure 2 shows the projected population increase over the same time period among Delawareans ages 65 and older.

---

<sup>1</sup> Excluded from this report are facilities that serve individuals under the age of 18, as well as Intermediate Care Facilities for Individuals with Intellectual Developmental Disabilities (ICF/IID). ICF/IID facilities provide active and comprehensive and individualized treatment and rehabilitation services to promote functional status and independence.

<sup>2</sup> <https://myhealthycommunity.dhss.delaware.gov/locations/state/deaths>

Between 2020 and 2050, Delaware's total population is expected to increase 7.7% (from 979,920 in 2020 to 1,055,289 in 2050). Overall population growth is distributed unevenly across Delaware's counties. From 2020-2050, New Castle and Kent Counties are expected to experience a 1.3% and 4.3% increase in total population, respectively; total population growth for Sussex County is estimated at 25.1% for the same time period.

**Figure 1: Delaware Population Projections (2020-2050), Overall Population, by County**

Source: Annual Population Projections, Delaware Population Consortium, Version 2020.0, October 2020.

Projected population growth is more dramatic among older Delawareans. From 2020 to 2050, the statewide population of Delawareans ages 65 and older is expected to increase 41.1% (from 186,045 to 262,581). The most dramatic increases in cohort size are projected among the oldest subpopulations. From 2020 to 2050, the number of Delawareans ages 65-69, 75-79, 80-84, and 85+ are projected to increase 8.7%, 7.1%, 36.6%, 86.3%, and 158.1%, respectively (Figure 2).

### NUMBER OF FACILITIES AND LICENSED BEDS

In 2020, 48 Delaware nursing homes operated 4,953 licensed beds. Most Delaware nursing homes – 46 out of 48 (96%) – were privately owned and operated in 2020. Private facilities operated 94% of all nursing home beds in Delaware. Delaware’s two publicly-operated nursing home facilities (Governor Bacon Health Center (GBHC) and the Delaware Hospital for the Chronically Ill) operated the remaining 6% of nursing home beds in 2020. In March 2020, Polaris Healthcare & Rehabilitation Center, a 26-bed private nursing home facility in Sussex County, opened to patients. In June 2020, GBHC, a 78-bed public nursing home in New Castle County, closed permanently. Partial-year data for GBHC is included in the 2020 DNHUSR.

### BILLABLE PATIENT DAYS

A commonly-used measure of nursing home utilization is the number of billable patient days generated by a facility over a given time period. A billable patient day represents a unit of time (i.e., one day) during which the facility’s services are used by one patient. For example, if a nursing home has 100 patients

on a day, the facility has generated 100 billable patient days for that 24-hour period. If a facility's number of billable patient days increases from one time period to the next, it is an indication that the facility is caring for more patients, caring for patients for longer periods of time, or a combination of these two factors.

Mathematically, billable patient days per facility per year are calculated by summing each facility's monthly billable patient days over a 12-month period.

From 2010-2019, annual billable patient days for private facilities in Kent, and Sussex remained stable (Table 2; Figure 3). Private facilities in New Castle County experienced an increase in annual billable patient days from 2010-2014 before stabilizing from 2015-2019. Consistent trends in annual billable patient days are observed even within the context of ongoing national expansion of home and community-based services and supports that shift the locus of long-term care away from nursing homes. In 2020, the COVID-19 pandemic reduced the number of billable patient days private facilities in all three counties. From 2019-2020, annual billable patient days declined 10.0%, 8.2%, and 11.6% in privately-owned New Castle, Kent, and Sussex nursing home facilities. Billable patient days in public facilities have steadily declined from 2010-2020.

## OCCUPANCY RATES

Occupancy rates are helpful for putting facilities' utilization data within the context of available resources. A facility's occupancy rate reflects the percentage of available beds occupied by patients throughout the reporting year. Occupancy rates were weighted based on the number of days a facility was open during the reporting year. Mathematically, for facilities that were open 365 days of the reporting year,  $\text{Weighted Occupancy Rate} = [(\text{Number of Billable Patient Days}) / (\text{Number of Licensed Bed Days})] * 100\%$  where (Number of Licensed Bed Days) equaled the number of licensed beds in a facility (calculated as the average number of beds over the entire 12-month period) multiplied by 365. If a facility was open fewer than 365 days of the reporting year, the same weighted occupancy formula was used with the exception that (Number of Licensed Bed Days) equaled the number of licensed beds multiplied by the actual number of days the facility was open.

In 2020, private nursing homes in New Castle, Kent, and Sussex Counties operated at 78.7%, 72.0%, and 76.6% occupancy, respectively (Table 3; Figure 4). In 2020, Delaware's two public nursing homes collectively operated at 48.0% occupancy. Prior to the pandemic (i.e., from 2010-2019) occupancy rates for private nursing homes consistently approached or exceeded 90%. The comparatively lower occupancy rate for Kent County private nursing homes relative to New Castle County and Sussex County private facilities, reflects a facility-related nuance: the Delaware Veterans Home (a larger, 150-bed facility) operates at a comparatively lower-occupancy (46.0% in 2020) due to admissions-based patient criteria.

## ADMISSIONS

In 2020, Delaware nursing homes admitted 8,238 patients. As shown in Table 4 and Figure 5, annual admissions to private facilities sharply declined in 2020 amid the COVID-19 pandemic. From 2019-2020, private nursing home admissions fell 29.9%, 34.2%, and 29.6% in New Castle, Kent, and Sussex Counties, respectively. Prior to the pandemic (i.e., from 2010-2019), private nursing home admissions in all three counties fluctuated within a fairly narrow range: approximately 6,000-7,000 admissions per year in New Castle County, approximately 3,000-4,000 admissions per year in Kent County, and approximately 1,300-2,000 admissions per year in Sussex County.

Conversely, annual admissions to public nursing homes have fluctuated erratically. Over the past decade, public nursing home admissions peaked in 2010 (119 admissions) before declining through 2019. The falling number of public facility admissions reflect facility closures and/or reduction in the number of available licensed public beds. In 2020, public nursing home admissions rose sharply to 33; however, this data point reflects the transfer of patients from one public nursing home facility to another (i.e., from GBHC to Delaware Hospital for the Chronically Ill) prior to the closure of GBHC in June 2020.

**Figure 5: Delaware Nursing Homes, Total Number of Nursing Home Admissions, 2010-2020, by Facility Type and County**

White patients accounted for 75.8% of all 2020 Delaware nursing home admissions (Table 5). Black patients and patients of other races accounted for 21.6% and 2.6% of 2020 nursing home admissions, respectively. This racial breakdown of nursing home admissions is in line with Delaware's demographic distribution. Patients 75-84 years and 85 years or older accounted for 31.2% and 29.7%, respectively, of 2020 Delaware nursing home admissions. Twenty-three percent of 2020 nursing home admissions were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for 15.6% of 2020 admissions. (Refer to Appendix A for further information on Delaware nursing home admissions and discharges among the under 65 population.)

**Table 5: Number (Percentage) of Delaware Nursing Home Admissions, by Race and Age, 2020**

The percentage of 2020 admissions under the age of 65 was higher among Black patients (25.6%) and patients of other races (20.9%) relative to White patients (12.6%) (Figure 6). Individuals under the age of 74 accounted for 54% of Black admissions and 54.1% of admissions among patients of other races; in comparison, just 34.3% of White admissions were patients under the age of 74. Accordingly, patients ages 85 and older accounted for a higher percentage of White admissions (33.7%) relative to Black admissions (17.6%) and admissions among patients of other races (15.3%).

## DISCHARGES

In 2020, Delaware nursing homes discharged 8,758 patients (Table 6; Figure 7), reflecting a sharp decline in discharges relative to the previous year and coinciding with the COVID-19 pandemic. From 2019-2020, private nursing home discharges fell 20.1%, 33.9%, and 22.3% in New Castle, Kent, and Sussex Counties, respectively. Prior to the pandemic (i.e., from 2010-2019), private nursing home discharge trends mirrored admission trends; that is, discharges from private nursing home facilities in all three counties fluctuated within a narrow range. Similar to public nursing home admissions, discharges from public nursing homes have fluctuated erratically over time. The falling number of public facility discharges reflect facility closures and/or reduction in the number of available licensed public beds. From 2019-2020, public nursing home discharges increased from 34 to 61; this increase largely reflects discharged patients from GBHC prior to the facility's closure in June 2020.

**Figure 7: Delaware Nursing Home Discharges, 2010-2020, by Facility Type and County**

As in previous years, in 2020, discharge destination varied greatly by facility type (Table 7). Half of all patients discharged from private facilities in 2020 returned to their own home or a relative's home. Compared to private nursing home discharges, a larger percentage of patients discharged from public facilities were discharged due to death (49.2% vs. 16.1%, respectively).

Discharge statistics mirror admission statistics in terms of patient race and age (Table 8; Figure 8). White patients accounted for 75.7% of Delaware nursing home discharges in 2020. Black patients and patients of other races accounted for 21.6% and 2.7% of 2020 nursing home discharges, respectively. Individuals 75-84 years and 85 years+ accounted for 29.9% and 34.0% of 2020 Delaware nursing home discharges, respectively. Just over one-fifth (22.1%) of 2020 nursing home discharges were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 14.0% of 2020 discharges.

Relative to White patients, comparatively larger percentages of Black patients and patients of other were under the age of 74 (Figure 8). Fifty-three percent of Black discharges and 45.7% of discharges among patients of other races represented individuals under the age of 74; in comparison, just 30.8% of White discharges were patients ages 74 and younger. Accordingly, patients ages 85 and older accounted for a higher percentage of White discharges (38.3%) relative to Black discharges (20.6%) and discharges among patients of other races (21.4%).

## SOURCE OF PAYMENT

Patient payment source for nursing home care varied by type of facility (Figure 9). In 2020, the majority of private and public nursing home patients used Medicaid as a source of payment, though a larger percentage of public nursing home patients used Medicaid as a source of payment relative to private nursing home patients (86.2% vs. 63.7%, respectively). In 2020, 14.6% of private Delaware nursing home patients used Medicare as a source of payment compared to just 3.3% of public nursing home patients. Sixteen percent of private nursing home residents and 6.3% of public nursing home patients self-paid for their care. A different payment source was utilized by 5.8% of private nursing home patients and 4.2% of public nursing home patients.

Licensed Bed Days are calculated as (Number of Licensed beds (as of December of the reporting year))\*(Total days the facility was open during the reporting year). Weighted occupancy rates at county, facility type, and state levels are calculated as the ratio of Billable Patient Days (sum of each facility in the category) and Licensed Bed Days (sum of each facility in the category).

Notes: The "other" payment category includes charitable pay, partial pay, private insurance, Veterans benefits, out-of-state Medicaid, and, in some cases, patients for whom medical status was pending at admissions. Percentages are based on end of month reports on the number of patients by source of payment.
